

Folding tables

*Ideal for meetings, restaurant and
events of every kind*

TOP-Turn

Never have you set up tables faster and easier

The "TOP-Turn" folding table has an especially clever folding system. You simply pull the tie rod underneath the table and you can turn the "TOP-Turn" by 95 deg. The tabletop locks into this position automatically. And equally fast you can tip the tabletop down again. And here it locks into place automatically as well.

„By the way, "TOP-Turn" is the only folding table in our range that "can move". On account of its large and stable rollers you can push the table very easily across any kind of underground. At the requested location you simply lock the two castors and the "TOP-Turn" stands dead certain. Due to this fact a single person can set up tables in rooms all by him or herself.

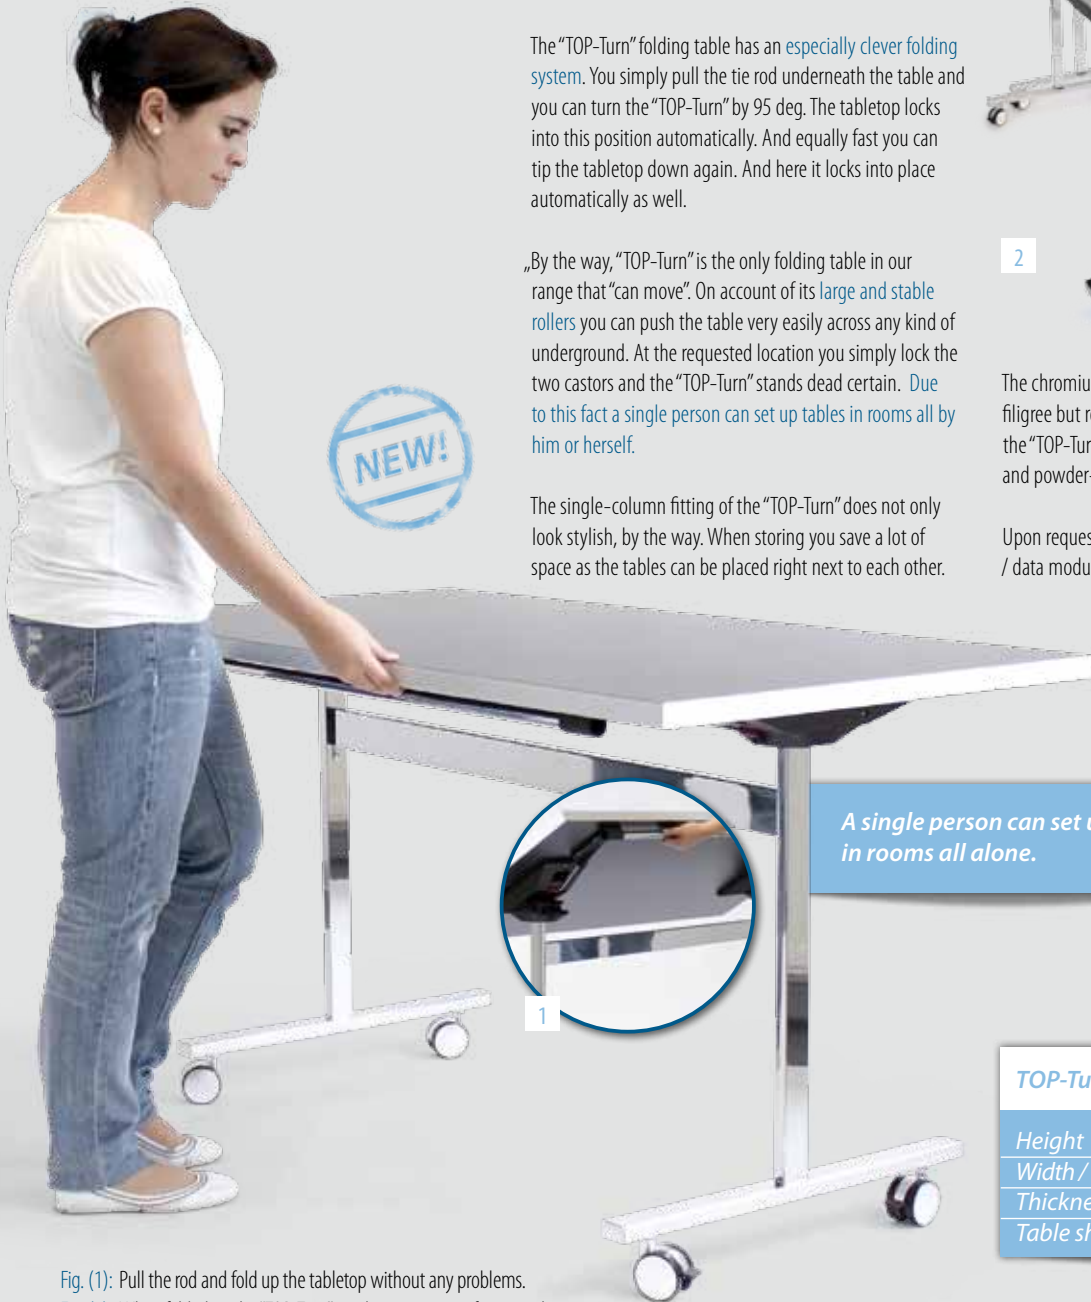

The single-column fitting of the "TOP-Turn" does not only look stylish, by the way. When storing you save a lot of space as the tables can be placed right next to each other.

2

The chromium-plated pedestal of the table consists of a filigree but robust steel pipe. Upon request, the steel parts of the "TOP-Turn" can be provided with satin chromium-plated and powder-coated surface (in all RAL colours).

Upon request, we can fit your "TOP-Turn" with hinged power / data modules, frame connectors or panel holders.

A single person can set up tables in rooms all alone.

TOP-Turn at a glance

Height	73 cm
Width / length	40 - 80 cm / 120 - 180 cm
Thickness	approx. 30 mm
Table shape	square, rectangular

Fig. (1): Pull the rod and fold up the tabletop without any problems.
Fig. (2): When folded up the "TOP-Turn" needs a minimum of space only.

Easily extended

In a few simple steps you can extend the tables "Dialogue", "Meeting" and "Relaunch" into entire table landscapes. For this purpose, simply push the corresponding tabletop extensions into the receptacles provided.

Edge veneers

Every folding table is available with ABS edge veneer, PVC edge veneer, solid wood veneer or beechwood frames. Tone-in-tone or in contrasting colours. Upon request we can also offer your table edges with chamfered edges.

Decorative colours freely selectable

The tabletops of our folding tables are available in all standard colours or wood reproductions. Ask your specialist dealers about which options there are.

Dialog

The perfect solution for the quick dialogue with totally individual shapes

This "slender" conference table is produced in series with high-quality PVC edge veneer or ABS edging.

We supply the sturdy tabletop in the colours ivory or pastel grey (particle board, coated, MS2 quality) ex works. Upon request, however, surfaces made of Thermopal or of the FunderMax collection can be provided as well. Patterns of other manufacturers are offered upon request as well.

All tabletops are provided with two aluminium T profiles for reinforcement on the lower side. This makes the tabletop very robust and dimensionally stable.

Fig. (1): A "round-table" can be set up in a few simple steps.

Rectangular, square, triangular, round, trapezoidal or semi-circular – just as you wish!

Dialog at a glance

Height	73 cm
Width / length	45 - 120 cm / 80 - 180 cm
Stickness	approx. 20 mm

Meeting

The noble conference table with surround beechwood edge

The "Meeting" folding table is the big brother of the "Dialog" model. The special feature is its surround beechwood edge which give it its special and massive appearance.

The stable fittings complete the high-quality picture. They can be supplied with chromium-plated and powder-coated surfaces in all RAL colours.

Meeting at a glance

Height	73 cm
Width / length	40 - 80 cm / 120 - 180 cm
Thickness	approx. 20 mm (edge 70 mm in height)
Table shape	rectangular and trapezoidal

The surround noble beechwood edge is standard!

These folding tables can be provided with T or H fittings.

Patented T and H fittings

Folding tables with these fittings have stable plastic caps which protect the floor against scratches. In addition, they avoid damages of the tabletops when stacking the folding tables.

Adjustable in height

Upon request, we supply our T and H fittings with height-adjustable plastic caps. These caps compensate unevenness of the floor in any easy way.

Gentle stacking buffer

In order to protect the valuable tabletops from being scratched when being stacked we have integrated practical stacking blocks. Upon request we supply the stacking buffers in a high-quality chromium-plated version.

Relaunch

The folding table with the newly designed mounting brackets

"Relaunch" is a further development of the tried and tested model "Dialogue". The special feature is its metal mounting brackets slanted by 45 deg. At the same time they are used as spacer when stacking the tables and thus are hardly visible anymore. For this reason the stacking height is only 7 cm.

As from a table dimension of 160 cm, the table is completely foldable and stackable. Most certainly the "Relaunch" brackets can be used for smaller tables as well, but they have to be transported and stored upright.

Like the "Dialogue", the "Relaunch" comes in all kinds of shapes.

45 deg. metal mounting brackets as spacer and for perfect stacking

Relaunch at a glance

Height	73 cm
Width / length	40 - 80 cm / 120 - 180 cm
Thickness	approx. 20 mm

Integrated media bar!

Media at a glance

Height	73 cm
Width / length	40 - 80 cm / 120 - 180 cm
Thickness	approx. 20 mm
Table shape	rectangular

Media

Conference folding table with integrated media infrastructure

On account of the practical power and media connector, the "Media" folding table meets all prerequisites for use as meeting, conference or training table.

A short press on the integrated metal housing, and the "Media" module opens as if by magic. The configuration between shockproof socket, ISDN or CAT5 RJ45 connectors can be chosen freely. All insets are clipped in, and - depending on the individual requirements - can be replaced with a turn of the wrist.

The major feature is: The modules can be connected with each other in a row, i.e. from table to table. The contacts of the plug-in connectors are safe to touch.

Various fittings

Each of our folding tables can be provided with the fittings of your choice. Page 6 shows you which fittings we have on offer.

Protective screen

Many of our folding table models can be fitted with practical screens (made of powder-coated perforated plate, for example). It prevents unwanted insights in a masterly way.

Multimedially extended

Upon request we provide each folding table model with freely configurable media bars which permit uncomplicated access to power and data supply.

Design Light

The lighter variant of the "Design" series with a single column table fittings

The "Design Light" concept dispenses with superfluous parts. For this reason, the folding table appears much lighter and tidy. Nonetheless it meets all requirements of high functionality.

Its easy handling, the very low stacking height of only 7.5 cm and the very low weight facilitate daily work.

One person sets up and removes the "Design Light" without a lot of effort.

Fig. (1): The T fitting saves weight and lets the table appear very filigree.

Low stacking height of 7.5 cm only!

Design Light at a glance

Height	73 cm
Width / length	45 - 80 cm / 160 - 180 cm
Thickness	approx. 30 mm
Table shape	rectangular

Design Line

Stylish single-column folding table with patented elliptical fittings

The new folding table "Design Line" is the innovative further development of our "Design Light" folding table. It is fitted with patented table fittings with oval centre column and integrated stacking buffer.

This new table fitting dispenses with the support brackets which are required otherwise. In addition, we can do without a separate snap lock and swing-out catch. Everything has been integrated in the new fitting already.

The "Design Line" is entirely foldable and stackable, and can be combined with every tabletop.

Special designs are possible!

Fig. (1): This picture shows the patented table fitting from the bottom.

Width / length	45 - 80 cm / 120 - 180 cm
Thickness	approx. 30 mm
Table shape	rectangular

Fittings for folding tables

These fittings can be freely chosen for each table model.

Surfaces:

Chromium-plated, satin chromium-plated and powder-coated in all RAL colours

T fitting, two-column

T fitting, one-column

H fitting

*Fitting
parliamentary one-column*

*Fitting
parliamentary two-column*

*Sled-base fitting, two-column
as from a minimum width of 55 cm*

Practical means of transport

The robust transport trolley can be loaded up to a maximum of 400 kg. Its four large and stable wheels with rubber tyres (two of which are castors) ensure easy movement on every surface.

Depending on the table model you can choose between the transport carriage for round and square tables.
