- *Suitable for outdoor use*
- *Suitable as seat grandstands*

Praktikus Light

No other modular platform is so lightweight and can be set up so quickly

Praktikus stages belong to the most popular mobile stages on the market. The Praktikus Light extends the stage series by a lightweight variant which can be used outdoors as well.

Can also be used outdoors

The „Praktikus Light“ is suitable for indoor as well as outdoor events.

Low-weight through the lightweight structure

The weight is considerably reduced thanks to a phenolic plywood board. The Praktikus Light has dimensions 2 x 1 m, which make it one-fourth times lighter; it weighs only 34 kg. A special longitudinal brace ensures the required stability and safety.

The key feature: The Praktikus Light is as stable as its elder brother. The Praktikus Light has been tested according to the most recent norms and standards and the TÜV Thüringen has issued the GS mark.

Thus, the Praktikus light has a loading capacity of 750 kg/m² according to DIN 15921 Entertainment technology – Aluminium platforms and frames.

Quick-release lever for maximum comfort and safety

Besides, our new platform is equipped with our practical quick-release levers. The key feature: You do not need any tools to set the eccentric clamp. Simply fold up the ergonomic lever and the clamp is free. Fold down once again and the lever is securely locked – even under double pressure. This simplifies the process of assembly significantly.

„Praktikus Light“ at a glance

| | |
|-------------------------|-----------------------|
| Area (W x D) | 100 x 200 cm |
| Weight | 34 kg |
| Loading capacity (max.) | 750 kg/m ² |
| Usable area | 2 m ² |
